## Recent Developments

### Global News

- Infections are increasing in at least 100 economies, with daily new cases about 18 percent higher than last week's, according to the **World Health Organization** yesterday. Omicron sub-variants BA.4 and BA.5 continue to drive the upward trend.
- The **European Union** (EU) will recognize the COVID-19 certificates of Korea and four other economies as equivalent to the EU Digital COVID Certificate, effective today. ASEAN+3 certificates already recognized by the EU are those issued by Indonesia, Malaysia, Singapore, Thailand, and Vietnam.

### Regional News

- Earlier this week, **China** cut the quarantine time at centralized facilities for inbound travellers from 14 to seven days, while the subsequent at-home health monitoring period has been reduced from seven to three.
- Daily new cases in the **Philippines** reached about 1,300 yesterday, the highest since late-February. The positivity rate appears to have increased in at least 10 areas of the economy, including in Metro Manila.
- In **Singapore**, the next wave of infections may have arrived earlier than expected. The health minister earlier warned of the new wave happening around July or August, but this was likely pushed forward to end-June by school holidays and overseas travel.

### Vaccine News

- **China** donated 2 million doses of COVID-19 vaccines to the Association of Southeast Asian Nations yesterday, to be given to **Myanmar**.
- **Korea** this week approved its first domestically developed COVID-19 vaccine for general public use. The vaccine, SKYCovione, will be given with a two-dose regimen for individuals aged 18 and above, with shots administered four weeks apart.
- The **US** Food and Drug Administration has advised vaccine manufacturers this week to produce an updated vaccine ahead of a planned booster campaign in October. The redesigned boosters are likely to include components targeting Omicron sub-variants, especially BA.4 and BA.5.

## ASEAN+3 and Selected Economies: Vaccination Coverage Status (Percent of population)

Sources: Our World in Data via Haver Analytics; and AMRO staff calculations.

Note: Percent of fully vaccinated population shows the number of people who received all doses prescribed by the vaccination protocol (e.g. one dose of a single-dose vaccine, or two doses of a two-dose vaccine). In the event of discrepancy between data from Our World in Data and national authorities, data from national authorities take precedence.
