## Recent Developments

### Global News

- **Australia** will fully reopen its borders to all vaccinated visa holders beginning February 21, nearly two years after authorities closed the borders.
- **Sweden** will be lifting its entry restrictions on foreign nationals from the Nordic region and the rest of the European Union beginning tomorrow, February 9.
- In **Germany**, authorities are reportedly working on plans to relax COVID-19 restrictions, likely to be announced this month, despite the still-high level of new cases.

### Regional News

- **Hong Kong** recorded over 610 new infections yesterday, a new high, with more cases likely in the coming days. Authorities today announced the strictest curbs yet, including a two-family cap on private gatherings, and banning entry to shopping malls, supermarkets, wet markets, and department stores if unvaccinated.
- **Indonesia** has tightened social restrictions in Jakarta and Bali, as well as in two other cities in Java, to stem the recent upward trend in infections.
- **Korea's** daily new infections topped the 35,000-mark for the fourth straight day today. Omicron remains the dominant strain behind the new infections.
- More than 17 million students are set to return to school starting today in **Vietnam**, the first time in about a year. Most schools will be open by the middle of this month, but temperature checks and protocols for positive cases will remain in place.

### Vaccine News

- **The Philippines** begun vaccinating 5 to 11-year-old children using Pfizer-BioNTech jabs today. Authorities plan to inoculate about 15.5 million kids within this age group.
- In **Japan**, authorities are considering to use the "conditional early approval" system for the antiviral pill being developed by local firm Shionogi & Co., which appears to be effective against omicron. The system allows a drug manufacturer to skip the final stage of clinical trials once a certain level of efficacy and safety has been confirmed.

## ASEAN+3 and Selected Economies: Cumulative Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

## ASEAN+3 and Selected Economies: Vaccination Progress

Source: Our World in Data via Haver Analytics; and AMRO staff calculations.

Note: Percent of fully vaccinated population shows the number of people who received all doses prescribed by the vaccination protocol (e.g. one dose of a single-dose vaccine, or two doses of a two-dose vaccine). The number in the gray box is the percentage of the population that has received at least one vaccine dose.
