## Recent Developments

### Global News

- New research shows that vaccinated people infected with Delta might be as contagious as unvaccinated people, contradictory to what was observed for other variants. Most vaccines remain highly effective at preventing severe disease.

### Regional News

- In **China**, an outbreak of the Delta variant has spread to several cities and provinces, with more than 50 local cases reported each of the last few days. Beijing is testing millions of residents and cordoning off residential compounds. The city of Wuhan will test all of its 12 million residents after three new cases were confirmed, the first local cases in more than a year.
- **Thailand** expands its containment restrictions to more provinces and extends them until the end of August. Traveling to the island of Phuket has been banned, with the fate of the Phuket Sandbox scheme yet to be determined.
- **Vietnam** extended its strict social distancing measures in 19 southern cities and provinces for another 14 days. Only essential stores are allowed to operate and people are required to stay home except for basic necessities.
- **Indonesia** will extend its mobility restrictions for major cities across Java, Bali and other islands for at least another week.

### Vaccine News

- A new study based on a trial of more than 40,000 people in Europe and the Americas shows that the Pfizer/BioNTech vaccine's efficacy declines about 6% every 2 months over a period of six months. More data is needed to assess longer horizons and to decide whether booster shots will be necessary.
- In the **United Arab Emirates**, the Sinopharm vaccine has been approved for children between 3 and 17 years following clinical studies.

## ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

## ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
