## Recent Developments

### Global News

- Unvaccinated people account for 97 percent of hospitalization cases in the US. Average new daily cases more than doubled to 32,315 from 10 days ago.
- Confirmed cases in **India** continued to trend downwards, registering an average of 33,000 cases per day. Authorities have warned against overcrowding at tourist spots amid fear of a potential third wave of infections.
- **France** reported a daily average of 7,514 cases in the past week, the highest since early-June. Over the weekend, a street demonstration involving 100,000 people, took place to protest against Covid-related measures, which include mandatory vaccinations for health workers and the requirement for health passes to access most public places.

### Regional News

- Average confirmed cases and deaths in **Indonesia** breached record-highs of 50,000 and 1,000 per day, respectively. Non-essential travels have been banned for a week starting on July 18 to prevent a new wave of infections during Idul Adha celebrations.
- **Thailand** announced an expansion of restrictions to three more provinces after average daily cases stayed above 9,000 for four consecutive days. The restrictions include travel curbs, mall closures and curfew. Average daily death toll rose to 90 over the weekend.
- More than 2,990 cases were recorded on a daily basis in **Japan**, a continued increase since end-June. Two athletes at the Tokyo Olympic Village have tested positive, raising fears of a cluster just days before the opening ceremony.

### Vaccine News

- **Israel** will no longer administer a third shot of the Pfizer-BioNTech vaccine to cancer patients after a review of data on hundreds of patients from oncology wards. Booster shots for patients with compromised immune systems, began on July 13.

## ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

## ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
