Recent Developments

Global News

- In the **United States**, hospitals in New York have begun terminating or suspending healthcare workers who are not following a state order that mandates vaccination against COVID-19. The resulting staff shortages is reportedly leading to some hospitals postponing elective surgeries or curtailing several services.
- **India's** daily new infections fell below the 20,000-mark for the first time in over six months today, after about 18,800 additional cases were recorded across the economy.

Regional News

- Authorities in **Japan** are set to decide today about fully lifting the state of emergency in Tokyo and 18 prefectures, as well as the quasi-state of emergency in other areas. Once formally lifted, the decision will signal the first time since early April that none of Japan's 47 prefectures is under any emergency declaration.
- **Thailand** is preparing to ease quarantine requirements for fully vaccinated tourists, along with a plan to reopen to foreign visitors in four phases, beginning October 1. Those fully vaccinated for at least 14 days will only be required to undergo seven days of quarantine upon arrival, provided they can show proof of vaccination.

Vaccine News

- **India** announced last week that it will allow the export of 8 million Johnson & Johnson vaccines by end of October, in line with a deal reached by the Quad economies (Australia, India, Japan, and the United States) earlier in March. The group's initial plan to ship a billion shots across Asia by end-2022 stalled after India stopped its exports in April due to a massive local outbreak.
- The **European Medicines Agency (EMA)** is currently evaluating whether a booster dose of Moderna's vaccine could be given at least six months after the second shot in people aged 12 years and above. The EMA is also set to decide early next month on whether it will endorse the booster shot of the Pfizer-BioNTech vaccine.

ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
