Recent Developments

Global News

- **New Zealand** today recorded 94 new cases, the highest daily count since the pandemic began, as the delta variant spreads in Auckland, its biggest city. The city will remain in lockdown for another two weeks while authorities attempt to accelerate vaccinations.
- **Russia** yesterday reported at least 34,300 new infections, its highest single-day tally so far. The recent trend in daily cases is being attributed to low vaccination rates.
- The **United States** will lift travel restrictions for fully vaccinated foreign travellers starting November 8. Those flying in will be required to show proof of vaccination and negative COVID-19 test.

Regional News

- **Japan** will begin conducting trials this week on using proof of vaccinations or negative test results at eateries. Beginning this Thursday in a few prefectures, the trials will allow those with such proof to eat in larger groups and also allow eateries to extend their opening hours.
- **The Philippines'** vaccination program has begun including children and young adults. The pilot run for minors aged 12 to 17 with underlying medical conditions began last Friday, and is currently implemented in Metro Manila. At least 1,500 in this age group has already received the first dose.

Vaccine News

- The **United States'** Centers for Disease Control and Prevention (CDC) will accept foreign travellers who received mixed-dose vaccinations, which is being increasingly used in some economies. The CDC has not recommended mixing vaccine types.
- The **US** Food and Drug Administration's vaccine advisory panel recommended to authorize a booster shot of **Johnson & Johnson's** COVID-19 vaccine for better protection of its recipients aged 18 and above. The additional jab can be received as early as two months from the initial dose.

ASEAN+3 and Selected Economies: Cumulative Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
