Recent Developments

Global News

- Daily confirmed cases in the **US** breached 20,000 for the first time since end-May 2021. The increase has been attributed to the Delta variant, present in 82 percent of cases.
- **UK** reported more than 34,000 daily cases in the past week, the highest since end-Jan 2021. A full economic reopening scheduled for July 19th, remains in place.
- **Australia** has a "firm commitment" to launch a quarantine-free travel bubble with **Singapore**, now likely to occur by year-end due to Sydney's outbreak.

Regional News

- **Malaysia** has closed a COVID-19 vaccination centre after more than 200 volunteers and workers at the centre tested positive. Average daily cases surpassed previous peak to reach more than 8,500 cases in the last week.
- **Indonesia** is expanding healthcare capacity, boosting vaccination drive and curbing mobility after cases and deaths rose to record highs. Frontline workers who have been fully vaccinated with Sinovac vaccine will receive a booster shot of Moderna vaccine.
- Daily cases in **Korea** reached all-time high, due to the highly contagious Delta variant. Vaccination roll-out was halted when strong demand crashed the booking website.

Vaccine News

- **WHO** has discouraged developed economies from ordering vaccine boosters, which would widen an already highly uneven and inequitable global supply gap.
- **US FDA** has issued an advisory on Johnson & Johnson vaccine after a small number of the rare autoimmune disorder, Guillain-Barré, were reported post-vaccination.
- A **Japanese** firm, Daiichi Sankyo, will begin Phase 3 clinical trials for its mRNA COVID-19 vaccine with plans for it to be available for use by 2022. Three other local companies are also conducting vaccine trials.

ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
