## Recent Developments

### Global News

- As cases continue to fall sharply, **India's** capital Delhi started easing restrictions yesterday, including by allowing indoor dining.
- In the **United Kingdom**, the plan to lift most remaining restrictions has been postponed until July 19 amid an increase of cases with the more contagious Delta variant.
- **South Africa** is experiencing a new wave of infections, with cases at their highest since January. Vaccination remains slow, and 2 million doses of the Johnson & Johnson vaccine had to be suspended due to contamination concerns at the US factory.
- Cases in **Russia** recorded its highest increase since mid-February. Restrictions in Moscow have been tightened.

### Regional News

- In **Vietnam**, amid a spike in new cases, Ho Chi Minh City will extend social distancing measures for two more weeks.
- From July 1, **Korea** will exempt some travelers—including citizens, foreign residents, or business travelers—from its two-week quarantine if they have been fully-vaccinated overseas. Testing before and after arrival will remain mandatory.
- Amid a pickup in infections, **Indonesia** will impose new restrictions, including reducing the maximum office capacity and shutting schools and places of worship in high risk areas. Measures will last until June 28.

### Vaccine News

- In the **United States**, Maryland-based Novavax announced Phase 3 trial results for its vaccine candidate. The 30,000 person trial in the U.S. and Mexico showed an overall efficacy of 90.4% for its two-dose regime.
- A new study from England shows that two doses of the Pfizer-BioNTech and AstraZeneca vaccines offer high protection against hospitalization from the delta variant. The risk of hospitalization after infection was reduced by 96% and 92%, respectively.

## ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

## ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
