## Recent Developments

### Global News

- Cases continued to surge in **India**, rising by more than 330,000 cases per day in the last 7 days. Healthcare system is being overwhelmed by lack of oxygen supply, intensive care units operating at full capacity, and nearly all ventilators being in use.
- Global death toll rose by more than 12,000 cases per day for the eighth consecutive day, with **India** and **Brazil** accounting for 36% of daily reported deaths.

### Regional News

- **Japan** reported detecting more than 20 new cases of COVID-19 variant originating from India. Daily cases average almost 5,000 in the last week, mainly stemming from the prefectures of Tokyo, Osaka and Hyogo, despite the state of emergency in those areas.
- More than 1 million cases have been recorded in the **Philippines**, the second highest caseload in the ASEAN+3 region, after Indonesia. Daily average cases have moderated slightly since Manila and four surrounding provinces were placed under lockdown starting end-March. Health authorities warned against relaxing restrictions too soon.
- **Thailand** imposed new restrictions yesterday to contain rising cases. Among other measures, mask wearing is now compulsory in 47 provinces, including Bangkok.

### Vaccine News

- The **World Health Organization** is reviewing Sinovac and Sinopharm for the first time. Approval of these vaccines would allow their inclusion into the Covax program, and boost vaccine supply to lower income countries significantly.
- **United States** will export up to 60 million of AstraZeneca doses in the next few weeks.
- The agreement between the Quad, comprising **United States, India, Japan and Australia**, to produce up to a billion coronavirus vaccine doses in India by end-2022 to supply to other Asian countries remains on track.

## ASEAN+3 and Selected Economies: Total Vaccines Administered

Source: Haver Analytics, sourced from Our World in Data; and AMRO staff calculations.

Note: Single vaccination doses only. This does not measure the number of people vaccinated, as two doses are required with most available vaccines. Data is reported at irregular intervals; numbers show latest available.

## ASEAN+3 and Selected Economies: Vaccinations and Aspired Population Coverage

Sources: Our World in Data via Haver Analytics; various media sources; Economist Intelligence Unit; and AMRO staff estimates and calculations.

Note: Percent of population vaccinated shows total administered doses divided by two to reflect the two-dose regime of most vaccines—it does not necessarily reflect the actual number of fully vaccinated people. Aspired 2021 targets and completion dates of widespread vaccination are goals, forecasts, or estimates.
