News

- Singapore** approved yesterday the local use of Moderna's vaccine, for people aged 18 and above. The first shipment is expected by March, and the two doses will be administered 28 days apart. This is Singapore's second authorized vaccine, after Pfizer-BioNTech's.
- The **United Kingdom** is launching a trial to assess whether combined vaccine doses, e.g. the initial dose from the Pfizer-BioNTech vaccine and the second from Moderna's, could trigger sufficient immune response. The results of the trial, expected by June, if positive could support a more flexible vaccine rollout around the world.
- China** is planning to provide 10 million doses of vaccines to the WHO-led COVAX facility. Three local companies—Sinovac, Sinopharm, and CanSino Biologics—have already applied for the inclusion of their vaccines to COVAX's stockpile. The facility is scheduled to begin rolling-out vaccines to low- and middle-income economies this month.
