Recent Developments

Global News

- **Worldwide** confirmed cases stood near 113 million, after at least 384,000 new cases were reported globally yesterday. Total deaths surpassed 2.5 million.
- In **Israel**, an open-air concert was held last Wednesday in a bid to restart cultural events. Attendance was restricted to those with a "green pass," which indicate that the holder has received two vaccine doses more than a week prior to the event, or that they have recovered and presumed immune. The government-issued "green pass" is valid for 6 months from the date of full vaccination.

Regional News

- **Thailand** is preparing to ease restrictions for travellers who have been vaccinated against the virus, with the aim of welcoming tourists by the third quarter of this year. The plan to gradually ease restrictions could include shortening the quarantine period from the standard 14 days to 3, for those vaccinated.
- **Singapore** is currently discussing the mutual recognition of vaccine certificates with other economies, which could help restart international travel. Those inoculated in Singapore receive a physical vaccination card that include details on the brand received and dates of vaccination.

Vaccine News

- **China** has approved two more vaccines for public use, bringing the number of authorized vaccines to four. One was made by CanSino Bio, and the second by the Wuhan unit of Sinopharm. The latter showed an efficacy rate of 75.2 percent, based on interim results from the company's Phase 3 trials. The new vaccines can also be stored in normal freezer temperatures.
- The **United States** Food and Drug Administration released its analysis on Johnson & Johnson's one-shot vaccine, showing its strong protection against severe symptoms and death. FDA's panel of advisers is expected to announce today whether the vaccine will be given emergency use authorization. Elsewhere, **Bahrain** has already approved the use of the vaccine, the first country to do so.

Note: The comparison is relative to each economy's own historical ratios, and does not take into account the quality of healthcare.

The greener the heatmap, the greater the capacity of the economy's healthcare system compared to its past capacity; the redder, the weaker the capacity.
