Statistics

- **Worldwide** confirmed cases increased by more than 630,000 yesterday, with 14,691 deaths. Total confirmed cases have now surpassed 97 million, with more than 2 million lives lost.
- 23,104 new cases were reported across the **ASEAN+3 region** yesterday.
- **Korea** reported 344 new cases yesterday, the first time daily figures dipped below 400 in the last 2 months. New cases have been steadily declining in the last fortnight.
- **Indonesia** reported more than 11,000 new cases yesterday, bringing the 7-day average to a new high of 11,721 new cases per week.
- 7-day average cases for **Japan** and **Malaysia** have doubled since Christmas and the New Year to reach 5,913 and 3,527 cases, respectively. Total deaths in each of the economies have also doubled since early-December.

News

- **United States** aims to inoculate 100 million people within President Biden's first 100 days in the office. Doubts have been raised over the feasibility of this goal as vaccine deployment has thus far been slower than expected.
- In a bid to curb the rapid spread of COVID-19, the **European Commission** has proposed for a "dark red" hot spot designation, from which only essential travel will be allowed. Borders are, however, urged to remain open to ensure uninterrupted flow of goods and travel for cross-border workers.
- **China** reported that a total of 15 million people have been inoculated as of January 20th. This falls short of the target of inoculating 50 million people, before the start of the Lunar New Year holidays on February 11th.
- **Japan** has denied media reports that vaccinations for the general population will start in May. The Government has announced that vaccination for frontliners and high-risk individuals will begin by end-February but has not provided a timeline beyond that.
- **Singapore** will mandate a COVID-19 antigen rapid test (ART) for all cargo drivers entering the island via land checkpoints starting today. Only drivers who test negative are allowed entry.

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Resolved cases (i.e. non-active cases) to total cases; serves as a proxy for the stage of the cycle.
