Statistics

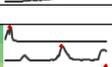

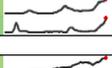

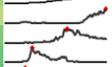

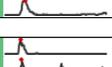

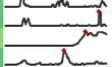

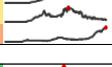

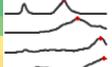

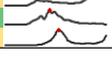

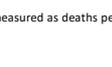

- **Worldwide** confirmed cases increased by more than 700,000 to edge closer to 75 million yesterday.
- 15,626 new cases were reported across the **ASEAN+3 region** yesterday.
- **Japan** reported 3,199 new cases, the highest increase the nation has ever seen to-date. 822 of these new cases stem from Tokyo.
- **Singapore** reported 24 new cases yesterday, the highest in more than 2 months. All the cases were imported.
- **Indonesia** reported more than 7,000 new cases, the highest number of cases reported since the all-time high of 8,369 new cases reported on 3 December.
- New cases in India continued to moderate, with 22,890 cases reported yesterday. This is the lowest daily increase in a week. Total confirmed cases in India is currently 10 million with 144,789 deaths.

News

- **French** President, Emmanuel Macron tested positive for COVID-19 after attending a number of high-profile events, including an EU summit and hosting parliamentary heads and leaders from the OECD. Several European leaders, including the Spanish Prime Minister, European Council chief and OECD Secretary-General have gone into self-isolation as a precautionary measure.
- Those who belong to certain groups - such as pregnant women, immuno-compromised persons and those under the age of 16 – have been advised to delay receiving the COVID-19 vaccine given the lack of large-scale clinical trials involving these groups.
- **China** plans to start vaccinating members of the public in southwestern Sichuan province early next year. At least one million people, mainly state employees and international students, have already been inoculated after vaccine candidates were approved for "emergency use".
- **Indonesia** urged Taiwan to reconsider its decision to indefinitely suspend the entry of Indonesian migrant workers after 85 COVID-19 cases, involving 14 employment agencies were registered in recent days.

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Resolved cases (i.e. non-active cases) to total cases; serves as a proxy for the stage of the cycle.
