Statistics

- Worldwide **confirmed cases** stood at 63.2 million yesterday, after more than 506,000 new cases were reported globally. Total deaths increased to 1.47 million.
- In the **ASEAN+3 region**, around 10,800 new cases were reported yesterday, the lowest daily increase in nearly two weeks.
- Japan** recorded around 1,450 new cases yesterday, falling below the 2,000-mark for the first time in five days. The number of severe cases continued to rise, reaching a new high of 472 yesterday. Total infections neared 149,000.
- New infections in **Hong Kong** eased to 76 from the previous day's figure of 115. More than half of the new cases remain linked to the dance studio cluster. Total cases have now surpassed 6,300, with 109 total fatalities.
- Korea** recorded 451 new cases yesterday, higher than the previous day. Of the new cases, 31 were imported. Total confirmed cases stood around 34,650.
- Vietnam** saw one local transmission case yesterday, the first in 89 days. Health authorities have quarantined at least 135 people who had close contact with the individual. The new case is reportedly linked to a flight attendant who earlier tested positive after returning from Japan on November 14.

News

- US** vaccine manufacturer **Novavax** announced yesterday that its late-stage trials in the United States will be postponed, for the second time, to the "next few weeks." So far, it has identified 100 trial sites across the **United States** and **Mexico** for its Phase 3. Novavax currently has ongoing trials for its vaccine candidate in the United Kingdom and South Africa.
- American Airlines**, a major international airline, announced yesterday that they have begun conducting trial flights from Miami, Florida to South America to prepare for the transportation of COVID-19 vaccines. The practice flights are reportedly simulating the conditions required for a vaccine to remain stable during transportation, including stress-testing the thermal packaging.
- US** biotech company **Moderna** announced yesterday that it will apply for emergency use authorization from the US Food and Drug Administration. Complete data from its trials suggest an efficacy rate of 94.1 percent, with zero severe cases. If Moderna receives the authorization, first injections could begin by December 21. Moderna is also planning to seek conditional approval from the European Medicines Agency.
