Statistics

- **Worldwide** confirmed cases stood at 48.7 million yesterday, with at least 580,000 new cases reported globally. Total fatalities reached 1.23 million.
- The **United States** saw a new record for daily new infections yesterday, after recording at least 110,000 new cases. Total confirmed cases increased to 9.5 million.
- In the **ASEAN+3** region, at least 8,900 new infections were reported, an increase from the previous day's figure.
- **Myanmar** saw new infections fall for the third-straight day yesterday, when it reported 995 new cases. This pushed total confirmed cases to nearly 58,000, while deaths increased to around 1,350 after at least 20 new fatalities.
- New cases in **Korea** rose for the third-straight day yesterday, when it reported 145 new cases. This was higher than the previous day's figure. Of the new cases, 28 were imported. The death toll stood at 476.
- **Indonesia** saw new cases rise above 4,000 yesterday, after nearly two weeks of recording daily new infections below this level. Total confirmed cases have surpassed 425,000. Around 90 new fatalities were also reported, pushing the death toll to above 14,300.
- New infections in **Malaysia** reached above 1,000 yesterday for the third-straight day, though the increase appears to be easing. Of the new cases, nine were imported. Total confirmed cases stood above 36,000, with the death toll nearing 280.

News

- **China** has barred the entry of non-Chinese travellers from several economies, including **the United Kingdom, Belgium, France, the Philippines**, and **India**, according to media reports. With infections rising globally, these restrictions cover even those with valid visas and long-term residency permits.
- A vaccine backed by the government of **India** could be launched as early as February of next year, earlier than initially expected. Bharat Biotech, the developer of the vaccine, called COVAXIN, is beginning late-stage trials this month. The drug has reportedly shown good efficacy in its previous trials and animal studies, according to scientists.
- **Korea**n drug maker Celltrion announced that patients treated with its experimental COVID-19 antibody drug in a small-size early-stage trial showed at least 44 percent improvement in recovery time. The company is planning to seek conditional approval for its antibody treatment for emergency use by the end of this year.
