### **Statistics**

- Worldwide confirmed cases <u>surpassed 54 million</u>, with more than 1.3 million confirmed deaths, following 300 days of global Covid-19 data reporting.
- A record of more than 11,000 new cases was reported across the **ASEAN+3 region** for both Friday and Saturday, with almost 1.3 million confirmed cases in total.
- Malaysia recorded more than 1,000 new cases a day between Friday and Sunday. Of yesterday's 1,208 new cases, 475 were recorded in Kuala Lumpur, more than in Sabah, the original epicenter of Malaysia's latest wave of cases.
- Japan's <u>daily new cases since Friday topped 1,700 cases twice</u>, with almost 1,500 additional cases added yesterday, levels last observed in July.
- **Korea** has reported <u>more than 200 cases a day</u> for the last three days, the highest increase in almost 11 weeks.
- **Indonesia** added <u>5,444 cases on Friday for a new daily record</u>, and an additional 5,272 on Saturday, the only two days with increases above 5,000 since the start of the outbreak.
- The **Australian** state of South Australia <u>reported 17 new cases over the weekend, following several months of no cases</u>. The new cluster emerged from a worker in a quarantine hotel.
- **Mexico** became the 11th country to <u>confirm more than 1 million cases in total</u>, and close to 100,000 deaths.
- Cases in the **United States** continue to rise, with <u>183,760 new cases reported on Friday</u>, more than 165,000 cases on Saturday and more than 132,000 cases yesterday.

### News

Social distancing measures in Hong Kong have been tightened again following a slight uptick
in unlinked locally transmitted cases. Measures include reduced restaurant and bar capacity,
smaller group sizes and limited dining hours. Measures started today and will run until at
least November 26.

Overview of Confirmed COVID-19 Cases Data as of 15/11/2020

Source: Haver Analytics, sourced from Johns Hopkins University; AMRO staff calculations.

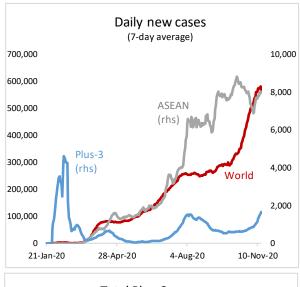

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

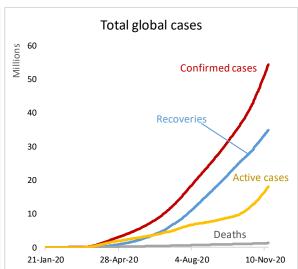

1/ Since January 31, 2020.

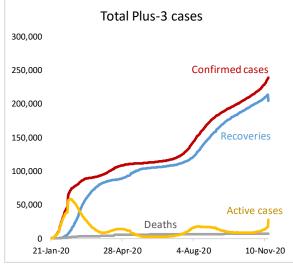

2/ Resolved cases (i.e. non-active cases) to total cases; serves as a proxy for the stage of the cycle.
