| Global Coronavirus Cases | ASEAN+3 Coronavirus Cases | Plus-3 Coronavirus Cases | ASEAN Coronavirus Cases |
|---|--|--|--|
| 48,090,690 Total Cases | 1,188,187 Total Cases | 222,441 Total Cases | 965,746 Total Cases |
| 31,889,030 Recovered Cases (66.3%) | 1,035,539 Recovered Cases (87.2%) | 204,494 Recovered Cases (91.9%) | 831,045 Recovered Cases (86.1%) |
| 1,225,202 Deaths (2.5%) | 30,366 Deaths (2.6%) | 7,014 Deaths (3.2%) | 23,352 Deaths (2.4%) |
| 14,976,458 Active Cases (31.1%) | 122,282 Active Cases (10.3%) | 10,933 Active Cases (4.9%) | 111,349 Active Cases (11.5%) |

Statistics

- **Worldwide** confirmed cases surpassed 48 million yesterday, while global deaths climbed to 1.23 million.
- The **United States** set a new record for daily new infections yesterday, when it saw at least 102,600 additional cases. Total confirmed cases stood at 9.4 million, after at least nine states reported new daily highs yesterday.
- In the **ASEAN+3** region, around 7,300 new infections were reported, slightly easing from the previous day's figure.
- New infections in **Myanmar** fell below 1,200 yesterday, the second-straight day of decline. Total confirmed cases neared 57,000, while deaths increased to 1,330.
- Total confirmed cases in **Korea** surpassed 27,000 yesterday, after it saw 125 additional infections. Of the new cases, seventeen were imported. The death toll stood at 475.
- **The Philippines** saw around 980 new infections yesterday, the lowest daily increase in more than four months, and 49 additional deaths. Total confirmed cases stood above 388,000.
- **Indonesia** reported more than 3,300 new infections yesterday, pushing total confirmed cases to at least 421,000. Total deaths increased to more than 14,200.
- New infections in **Malaysia** surpassed 1,000 for the second day yesterday, though slightly easing from the previous day's figure. Of the new cases, three were imported. Sabah continued to account for more than half of the new infections.

News

- Health officials in **Korea** approved a new test that could detect both COVID-19 and seasonal influenza from the same samples. With both illnesses sharing symptoms, the test—which will yield results in three to six hours—is expected to reduce the burden on hospitals and medical staff. The test is an evolved version of PCR tests used to detect COVID-19.
- **Denmark** is planning to cull its entire population of roughly 15 million minks, after these were found to have spread a mutation of COVID-19 to at least 10 individuals. The mutation is reportedly causing a decreased sensitivity against antibodies, thus potentially lowering the efficacy of future vaccines. Denmark is the largest producer of mink fur in the world.
- **Italy** announced yesterday that it will lock down six of its regions, which includes financial capital Milan and the whole of Lombardy, in order to curb infections. The new measures, which will ban residents from crossing borders except for work or health, will take effect this coming Friday. Bars, restaurants, and all non-essential shops will also be closed.

Overview of Confirmed COVID-19 Cases

Data as of 4/11/2020

| Economy | Total Cases | Cases per 1M Population | New Cases | New Cases per 1M Pop. | New Cases (7-day avg) ¹ | ΔNew Cases | Δ% New Cases | Total Deaths | New Deaths | Fatality Rate (%) | Total Recovered | Recovery Rate (%) | Active Cases | Resolved cases (%) ² |

Source: Haver Analytics, sourced from Johns Hopkins University; AMRO staff calculations.

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Resolved cases (i.e. non-active cases) to total cases; serves as a proxy for the stage of the cycle.
