Statistics

- **Worldwide** confirmed cases surpassed 50 million, topping 600,000 new cases on Friday and remaining above 500,000 cases a day for five days in a row.
- 9,326 new cases were reported across the **ASEAN+3 region** yesterday, following two days of more than 10,000 new cases—two of the highest increases in the region since the start of the pandemic.
- The **Philippines** reported 2,434 new infections, the highest daily tally in about three weeks. Cases remained above 2,000 for three straight days.
- While daily new cases in **Myanmar** are trending downwards slightly, more than 1,000 cases a day were confirmed over the weekend, for a total of more than 60,000 confirmed cases.
- **Japan** confirmed 955 new cases yesterday including record cases on the island of Hokkaido, following daily increases above 1,000 for three straight days, levels last seen in late-August.
- **Malaysia** reported a record of 1,755 new cases on Friday, and cases remain elevated, for a total of more than 40,000 confirmed cases.

News

- **Cambodia's** Prime Minister and four Cabinet members have been quarantined after a meeting with Hungary's Foreign Minister last week who was later tested positive. All Cambodian participants in the meeting have so far tested negative, but will remain in quarantine for 14 days.
- In **Singapore**, migrant workers recovered from Covid-19 will now be exempted from regular routine testing. The decision is based on scientific evidence that the majority of recovered patients have antibodies at least 180 days from the onset of illness, suggesting that they are a low risk of re-infection.
- The **Australian** state of Victoria will further ease its lockdown policies in Melbourne after recording no cases for ten straight days. Melbourne residents will be able to travel again within the state, restaurants and cafes will be able to host more customers, and gyms and indoor sporting facilities can reopen. Restrictions such as having a maximum of two visitors a day will remain, as several recent outbreaks in the city were connected to home visits.
- Many countries in **Europe** are experiencing substantial strains on their health system capacity as infections surge. To stop the resurgence, more countries and regions are going back into lockdown, including England, several parts of Italy, as well as Austria and Latvia.

COVID Monitor

Overview of Confirmed COVID-19 Cases
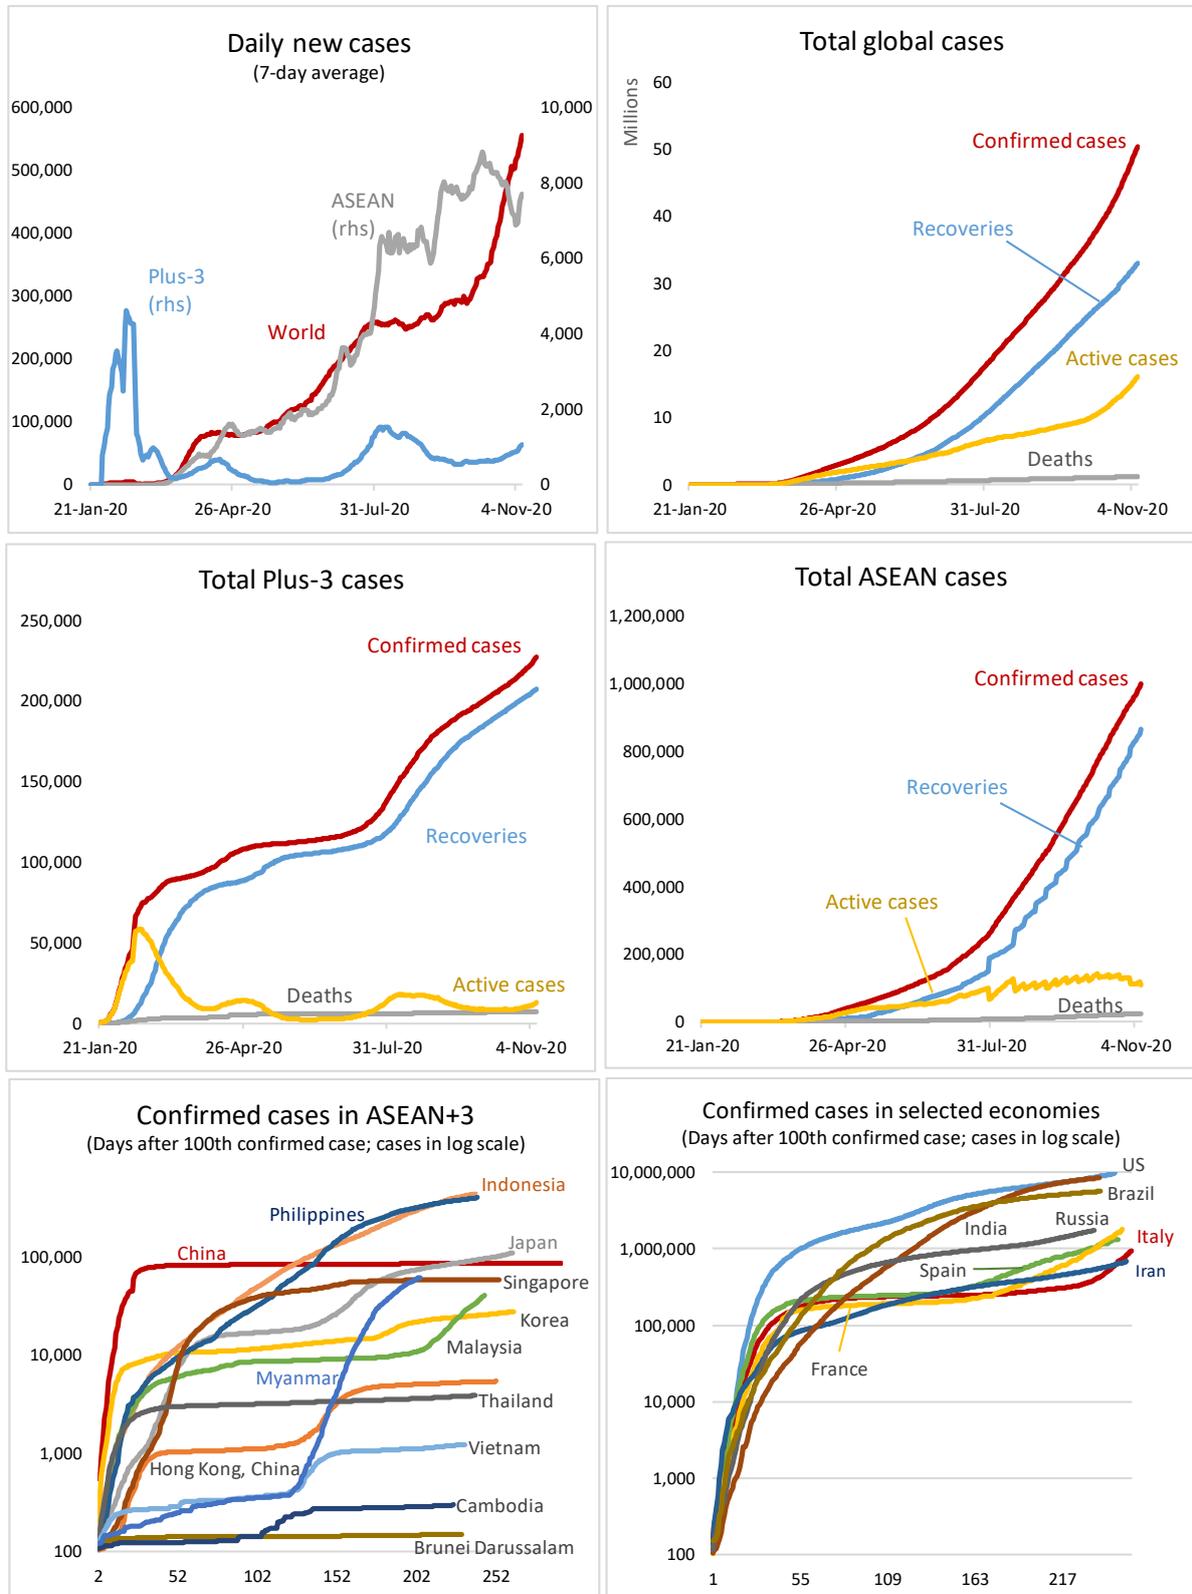

Data as of 8/11/2020

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Resolved cases (i.e. non-active cases) to total cases; serves as a proxy for the stage of the cycle.
