Statistics

- **Worldwide** confirmed cases stood at 35.4 million yesterday.
- Across the **ASEAN+3 region**, around 7,700 new cases were reported yesterday, slightly lower than the previous day.
- New infections in **Myanmar** reached 987 yesterday, easing slightly from the previous day. Its confirmed cases stood around 18,780, while total deaths increased to 444, after 32 more fatalities were reported.
- **Malaysia** reported 432 new infections yesterday, a record daily high, pushing its total cases to above 12,800. Of the new cases, only three were imported. The state of Kedah reported more than half of the new cases, followed by Sabah.
- **Indonesia** saw around 3,600 new cases yesterday, slightly lower than the previous day's tally. Total cases stood above 307,000, while the death toll increased to more than 11,250.
- Daily new infections in **Russia** rose to nearly 10,800 yesterday, an increase from the previous day, and the highest since the middle of May. Of the new cases, at least 3,500 were from capital Moscow. Total confirmed cases stood at 1.22 million.
- **India's** daily new infections fell below 70,000 yesterday, the lowest since the last week of August. Total confirmed cases stood at 6.7 million.

News

- The **United States'** Centers for Disease Control and Prevention (CDC) in a guidance yesterday acknowledged that COVID-19 can spread via airborne transmission. This comes a few weeks after the CDC initially published a similar warning in its website, which was taken down after two days. According to the agency, there was evidence that those sick with the virus may have infected other people as far as 6 feet away, especially in poorly ventilated, enclosed spaces that keep the virus lingering in the air.
- **US** President Trump returned to the White House yesterday, after three nights of staying in a military hospital for COVID-19. The president, who still has not fully recovered from the infection, urged Americans to "get out there" and to not be afraid of the virus.
- **Russia** is fast-tracking the approval of its second COVID-19 vaccine, called EpiVacCorona. The health ministry is expecting to approve the vaccine being developed by the State Research Center of Virology and Biotechnology VECTOR—formerly known for biological warfare research—by the middle of this month. Authorities are reportedly reviewing the vaccine now for "safety and quality." Russia's first vaccine, Sputnik V, was approved last August.

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Resolved cases (i.e. non-active cases) to total cases; serves as a proxy for the stage of the cycle.
