Statistics

- Worldwide confirmed cases <u>surpassed 30 million</u>, with more than 944,000 confirmed deaths. It took less than six weeks to add 10 million cases.
- <u>8,102 new cases</u> were reported across the **ASEAN+3 region** yesterday, slightly lower than the last few days.
- The outbreak in **Myanmar** continues to grow, as <u>more than 400 new cases</u> were reported.
- China reported <u>32 new cases</u>, its highest increase in more than one month. <u>All new cases are imported</u>.
- France recorded more than 10,000 new cases, one of its highest daily tallies.

News

- Today is the <u>deadline for countries to join the COVAX facility</u>, a global collaboration to accelerate the development, production, and equitable access to COVID-19 vaccines, co-led by the Gavi vaccine alliance, the Coalition for Epidemic Preparedness Innovations (CEPI) and WHO. COVAX is intended to procure and deliver 2 billion doses of approved vaccines by the end of 2021. It currently has nine COVID-19 vaccine candidates in its portfolio.
- <u>More than 170 countries have already joined COVAX</u>. Higher-income economies will help to finance vaccines for lower-income economies under the scheme. Notably, the United States will not join the facility and instead rely on bilateral deals for vaccine supply. Some other high-income economies will support financing the scheme, but will buy their own vaccines.
- Tomorrow, the <u>"Travel Corridor" in the United Kingdom will remove Singapore and Thailand</u> from its list of countries under which arriving travelers need to quarantine. Other ASEAN+3 economies already exempted from quarantine include Japan, Korea, Malaysia, Vietnam, Hong Kong, and Brunei Darussalam. The rules are unilateral.

Overview of Confirmed COVID-19 Cases

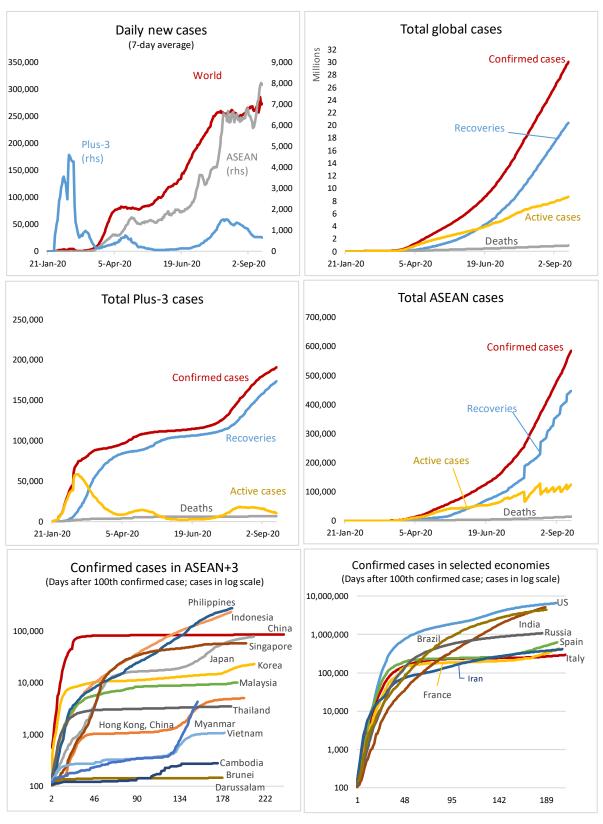

Data as of	17/9/2020
Data as OI	1//9/2020
