## Statistics

- More than 6,200 new cases were reported across the **ASEAN+3 region** yesterday for a total of more than 428,000 confirmed cases and 13,623 deaths.
- Of these cases, the majority were reported across the **ASEAN countries**, with 3,145 new cases in the **Philippines** and 1,679 cases in **Indonesia**.
- More than 1,100 cases were reported in the **Plus-3 economies**, including 983 new cases in **Japan**. Japan's daily tally remained below 1,000 cases for the first time since last Wednesday, though Monday's data is usually lower than other days.
- 78 new cases were reported for **Hong Kong**, the first time in almost two weeks with a rise of less than 100.

## News

- The **Australian** state of Victoria, which is experiencing a second wave of cases in its capital Melbourne, has increased its fines for anyone with a Covid-19 infection breaking isolation orders. Hundreds of infected people had been found to have left their homes.
- U.S. pharmaceutical company Eli Lilly & Co. started a late-stage trial to test an experimental Covid-19 antibody drug in nursing homes. The drug is already being tested as a treatment for infection patients, but the nursing home trial will determine whether it also works prophylactically.
- Many cruise ship operators suspended operations after several high-profile outbreaks on cruise ships early in the pandemic. Norwegian Hurtigruten cruise line has been one of the first to resume operations, but had to suspend all operations again following an outbreak on one of its ships, and all passengers and crew were placed under quarantine. The ship visited several ports in **Norway** before the first positive tests, possibly exposing several villages to the virus.

## Overview of Confirmed COVID-19 Cases

Data as of 3/8/2020

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

<sup>1/</sup> Since January 31, 2020.

<sup>2/</sup> Recovery rate is a proxy for the stage of the cycle.
