Data as of August 20, 2020

Figure 1. ASEAN+3 and Selected Economies: Covid Cycle Heat-map

Sources: Haver Analytics, sourced from John Hopkins University; and AMRO staff calculations.

Note: Based on [Hinojales, Marthe, Anne Oeking, and Li Lian Ong. 2020. "Where are We in the Covid Cycle?" AMRO Analytical Note, Singapore, April 27.](#) Minor outbreaks classified as outbreaks in the bottom 75th percentile of a country's 7-day average daily new cases. Outbreaks can retroactively be reclassified as non-minor if a later date breaches the 75th percentile threshold. The individual trajectories through the various stages of the Cycle are detailed in Figure 10.

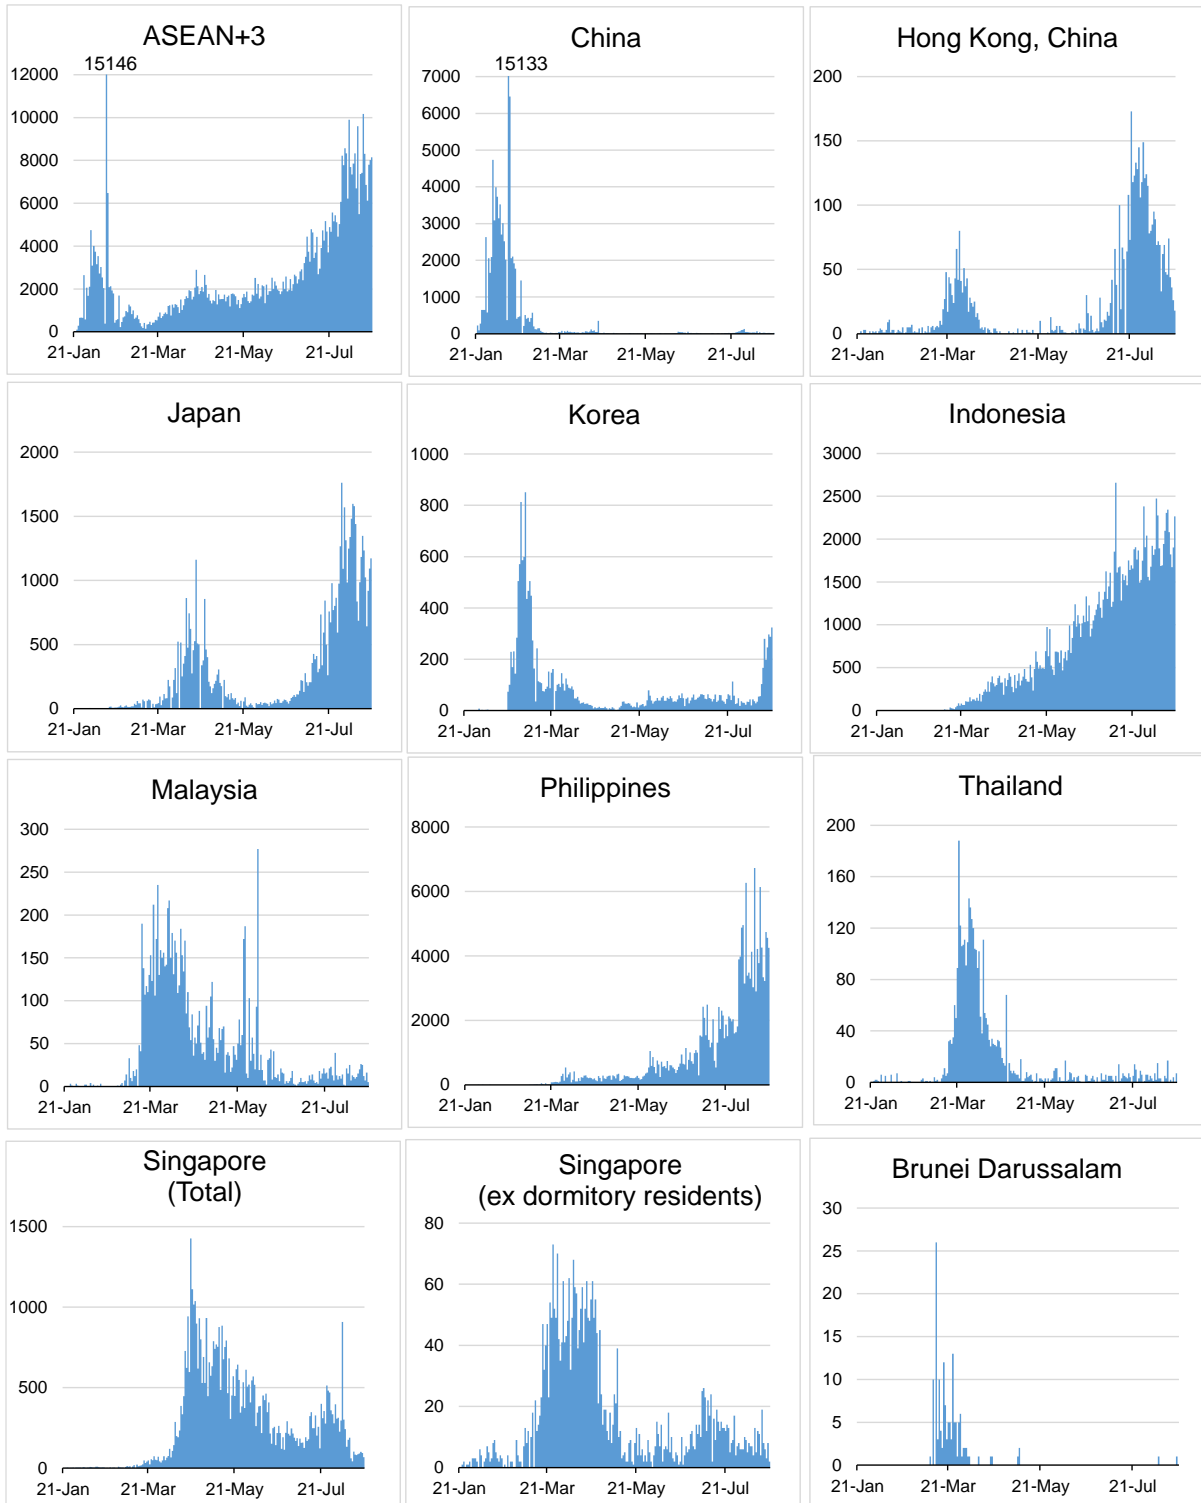

Figure 2. ASEAN+3 and Selected Economies: Capacity of the Healthcare System during COVID-19
(Measured by the number of hospital beds to active cases)

Sources: Haver Analytics, sourced from John Hopkins University; World Health Organization; and AMRO staff calculations.

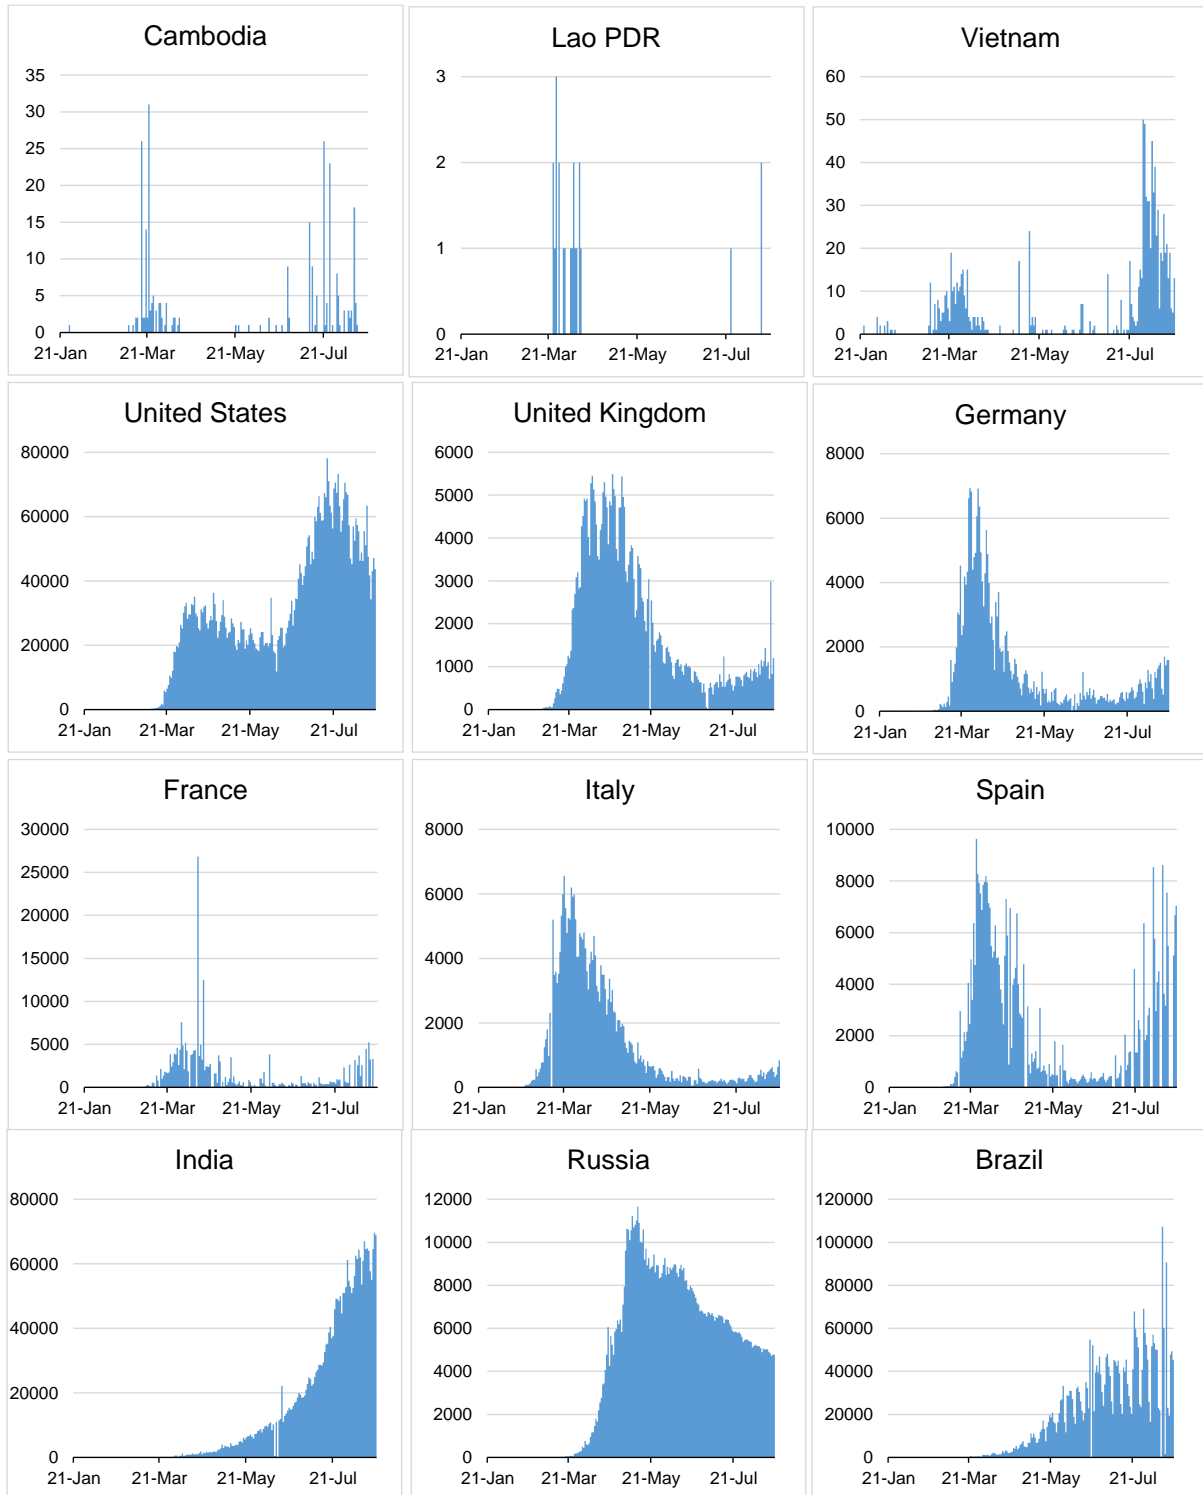

Note: The greener the heatmap, the greater the capacity of the healthcare system; the redder, the weaker the capacity.

Figure 3. Selected Economies: Daily Confirmed Cases

Note: For Singapore, the majority of the new confirmed cases belongs to work permit holders residing in dormitories. For the past one week (August 14–20), the proportion of this group of cases took up 91.7% of the total new cases.
