### Statistics

- Worldwide confirmed cases <u>surpassed 23 million</u>, with more than <u>800,000 confirmed</u> <u>deaths</u>.
- **China** reported <u>16 new cases yesterday, all imported</u>. It is the eighth consecutive day with no reported local transmission.
- In Korea, <u>397 and 266 new cases were reported for Saturday and Sunday</u>, respectively. The 397 new cases mark the <u>highest daily increase since March 7th</u>.
- <u>4,884 newly confirmed cases</u> were reported in the **Philippines** on Saturday and <u>2,352 cases</u> <u>yesterday</u>, its lowest daily tally in almost four weeks. Almost 190,000 cases have been confirmed so far, with close to 3,000 deaths.
- Indonesia has <u>reported more than 2,000 new cases on each of the last four days</u>, for a total of 153,500 confirmed infections and 6,680 deaths.
- Outside the ASEAN+3 region, **India's** confirmed infections have <u>topped 3 million</u>. It reported a record increase of almost 70,000 cases for Friday, and has reported more than 60,000 cases daily for six straight days.
- **Mexico** <u>surpassed 60,000 confirmed deaths</u> over the weekend, the world's third highest reported death toll, trailing only the United States and Brazil.
- The second wave across Europe is accelerating in several countries. Spain reported more than 8,000 new infections on Friday, <u>a level last observed at the height of the first wave in March/April</u> (NB: Spain does not currently report data over the weekend). Similarly, France's 4,677 new cases reported yesterday was <u>one of the largest increases since March/April</u>.

### News

• The <u>U.S. Food and Drug Administration has given emergency use authorization for blood</u> <u>plasma from recovered coronavirus patients as a treatment option</u>. Early research suggests blood plasma can lower mortality and improve patient health, but more trials are needed to prove its effectiveness.
