Recovered Cases		Deaths
(58.1%)		(2.8%)
77,664		
Active Cases		
(39.1%)		

Statistics

- **Worldwide** confirmed cases stood at 13.6 million yesterday, with around 584,000 deaths. The **United States**, **Brazil**, and **India** collectively accounted for 60 percent of yesterday's new cases.
- In the **ASEAN+3,** around 3,900 new infections have been recorded yesterday, higher than the previous day's number. This is driven by new cases in **Indonesia** and **the Philippines**.
- **Hong Kong** reported 19 new cases yesterday, a marked decline from the previous day's tally of 48. Of the new cases, five had been imported, while half of the local cases remain untraceable. Total confirmed cases stood at 1,588.
- In **Japan**, Tokyo saw an additional 165 infections yesterday. This is its seventh-straight day of triple-digit increases, prompting the metropolitan government to move its alert to the highest level.
- **Indonesia**'s confirmed cases reached the 80,000 mark yesterday, after recording 1,522 new infections. East Java and Jakarta remain the country's hotspots. The death toll stood at 3,797 yesterday after 87 more died.
- After reporting 1,305 new infections, total confirmed cases in **the Philippines** reached 58,850 yesterday. Fatalities reached 1,614 after 11 more deaths were recorded.

News

- Authorities in **the Philippines** warned that beds allotted for COVID-19 patients in the National Capital Region, which includes Metro Manila, are nearing full capacity. The region is now considered a "danger zone," as more than 70 percent of beds are already utilized. Four other regions are classified under the "warning zone," meaning a bed utilization rate of at least 30 percent.
- In **Thailand**, the prime minister has ordered the review of travel privileges given to foreign diplomats and military delegations. This follows after two foreigners, who tested positive for COVID-19, were able to bypass quarantine rules.

COVID Monitor

## Overview of Confirmed COVID-19 Cases

Data as of 15/7/2020

Source: Haver Analytics, sourced from John Hopkins University; AMRO staff calculations.

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Recovery rate is a proxy for the stage of the cycle.
