Statistics

- As the pandemic continues to accelerate, **worldwide** confirmed cases surpassed 13 million yesterday, with almost 573,000 confirmed deaths. It took only five days for infections to increase from 12 to 13 million.
- Around 193,000 new cases were reported across the world yesterday. Of these, about 55 percent are accounted for by three hotspots: the **United States**, **India**, and **Brazil**.
- In the **ASEAN+3,** more than 2,500 new cases have been recorded yesterday, slightly lower than the previous day's number. **Indonesia** and **the Philippines** continue to drive the trend of new cases in the region.
- **Hong Kong** reported 52 new cases yesterday, the second-straight day of increase, plus one death. Most are believed to have been locally transmitted, but are still unlinked to known clusters. This brings its confirmed cases to 1,521.
- **Indonesia** recorded 1,282 new infections yesterday, slightly lower than the previous day's tally, with 50 additional fatalities. This brings its total COVID-19 cases to more than 76,500.
- **The Philippines** reported 747 new infections yesterday, a marked decrease from more than 2,000 additional cases the previous day. The country's number of confirmed cases currently stand at 57,000.

News

- Following the recent spike in new cases, **Hong Kong** implemented new and stringent social distancing measures yesterday. These include mandatory wearing of face masks when taking public transport, keeping public gatherings to only four people, and limiting dine-in services in restaurants. Some establishments, like gyms and bars, are also to close for a week.
- **Indonesia** is aiming to open more laboratories across the country to boost its nationwide testing capacity by more than 50 percent, or from 30,000 to 50,000 daily, after cases have surged past 76,500.

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Recovery rate is a proxy for the stage of the cycle.
