Global Coronavirus Cases	ASEAN+3 Coronavirus Cases	Plus-3 Coronavirus Cases	ASEAN Coronavirus Cases
<p>7,360,239 Total Cases</p> <p>3,454,807 Recovered Cases (46.9%)</p> <p>416,201 Deaths (5.7%)</p> <p>3,489,231 Active Cases (47.4%)</p>	<p>222,599 Total Cases</p> <p>159,600 Recovered Cases (71.7%)</p> <p>9,031 Deaths (4.1%)</p> <p>53,968 Active Cases (24.2%)</p>	<p>113,257 Total Cases</p> <p>105,282 Recovered Cases (93.0%)</p> <p>5,836 Deaths (5.2%)</p> <p>2,139 Active Cases (1.9%)</p>	<p>109,342 Total Cases</p> <p>54,318 Recovered Cases (49.7%)</p> <p>3,195 Deaths (2.9%)</p> <p>51,829 Active Cases (47.4%)</p>

Statistics

- 2,530 new cases were reported across the **ASEAN+3 region** yesterday.
- **Indonesia** reported another daily high with 1,240 newly confirmed cases. 36 new deaths were reported, for a total of 34,316 cases and 1,959 deaths.
- **The Philippines** confirmed 740 new cases, one of its highest daily increases. Total numbers stand at 23,732 confirmed cases and 1,027 confirmed deaths.
- **Malaysia** reported 2 new cases, the third consecutive day it has recorded single-digit daily increases, after some recent spikes related to cases in immigration detention facilities.

News

- The WHO clarified its statement on rare asymptomatic transmission and put it in the full context. A small number of studies found limited transmission among truly asymptomatic cases. However, there is a key difference between truly asymptomatic cases (i.e., those that never develop any symptoms) and pre-symptomatic cases (i.e., those that have not yet developed symptoms, but will in the future). The difference in transmission among these cases remains unclear at this time.
- In the **United States**, similar to global trends, some of the most heavily affected areas early in the US outbreak (such as New York and New Jersey) see decreases in new cases, while several other states previously not strongly affected show an increase. In addition, hospitalizations in these states have also increased, suggesting that the increase is not entirely a result of more testing.
- After almost four months, the **European Union** is planning a gradual and partial easing of its travel ban on travellers from third-countries starting July 1. The EU was one of the most heavily affected regions at an earlier stage of the pandemic, but most countries have seen a continuous drop in infections.

Overview of Confirmed COVID-19 Cases

Data as of 10/6/2020

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

^{1/} Since January 31, 2020.

^{2/} Recovery rate is a proxy for the stage of the cycle.
