## Statistics

- **Worldwide** daily new cases hovered around 140,000 for two straight days, a new record. Most new cases remain concentrated in Latin America, the United States and South Asia.
- 1,887 new cases were reported across the **ASEAN+3 region** yesterday.
- With a total of 41,431 cases and as it is ramping up testing, **Indonesia** surpassed Singapore as the ASEAN economy with the highest number of cases. Indonesia's confirmed death toll stands at 2,276.
- **India** reported a new daily high of 12,881 new cases. The total number of confirmed cases has reached almost 367,000 with 12,237 confirmed deaths.
- **Brazil** reported more than 30,000 new cases for two straight days, including its highest daily increase yesterday, for a total of 955,377 cases.
- **Chile** reported a record high of 36,179 new cases, though only 4,757 are freshly confirmed cases. The remainder are previously confirmed cases that had not yet been added to the total tally.
- The **United States** reported more than 25,000 new cases yesterday, its highest increase in almost two weeks. Several states, including California, Texas and Florida, report an elevated increase in cases.

## News

- **New Zealand's** military is now overseeing the country's quarantine facilities after two imported cases from the United Kingdom. The two women were allowed to leave quarantine early due to a "compassionate exemption" to visit a dying relative, but were later tested positive for the virus. They are the first coronavirus cases in New Zealand in more than three weeks, eight days after no active cases in the country remained.

## Overview of Confirmed COVID-19 Cases

Data as of 17/6/2020

Economy	Total Cases	Cases per 1M Population	New Cases	New Cases per 1M Pop.	New Cases (7-day avg) <sup>1</sup>	ΔNew Cases	Δ% New Cases	Total Deaths	New Deaths	Fatality Rate (%)	Total Recovered	Recovery Rate (%) <sup>2</sup>	Active Cases

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Recovery rate is a proxy for the stage of the cycle.
