## Statistics

- **Worldwide** confirmed cases surpassed 5.8 million, with more than 117,000 new cases yesterday, the highest daily increase so far. Most new cases were reported in Brazil and the United States.
- After two days of elevated increase in new cases earlier this week, **Malaysia** reported only 10 new cases yesterday—its lowest daily increase since March.
- **Thailand** reported 11 new cases, all among quarantined repatriated citizens.
- **Korea** reported 58 new cases, down from 79 the previous day, but higher than averages over the last weeks.

## News

- In **Korea**, in response to a new cluster of cases at a logistics center in Seoul, public facilities such as museums and parks in the Seoul metro area will be temporarily closed. Residents will be encouraged to work from home and to avoid going out for the next two weeks. Stricter social distancing measures will be implemented if the situation worsens.
- In **Japan**, a new cluster in the city of Kitakyushu has emerged with 43 cases over the past six days. The transmission route remains unclear for several of the cases, raising concerns about a second wave of infections.
- **Thailand** is aiming for a full reopening by July 1. This would include lifting all business restrictions and activity lockdowns, domestic and international travel, as well as the end of the emergency decree and curfew. Leading up to it, the third phase of the lockdown relaxation will take place in June.
- In **Europe**, more professional soccer leagues will resume play. The English Premier League is set to restart on June 17 and Italy's Serie A on June 20. Germany's Bundesliga already resumed play on May 16. Games are taking place in empty stadiums.

## Overview of Confirmed COVID-19 Cases

Data as of 28/5/2020

Notes: New cases since previous day. Δ% refers to percentage change since previous day. Fatality rate measured as deaths per confirmed infections.

1/ Since January 31, 2020.

2/ Recovery rate is a proxy for the stage of the cycle.
