Global Coronavirus Cases	ASEAN+3 Coronavirus Cases	Plus-3 Coronavirus Cases	ASEAN Coronavirus Cases
<b>1,426,096</b> Total Cases	<b>111,650</b> Total Cases	<b>96,911</b> Total Cases	<b>14,739</b> Total Cases
<b>300,054</b> Recovered Cases (21.0%)	<b>87,826</b> Recovered Cases (78.7%)	<b>84,686</b> Recovered Cases (87.4%)	<b>3,140</b> Recovered Cases (21.3%)
<b>81,865</b> Deaths (5.7%)	<b>4,115</b> Deaths (3.7%)	<b>3,619</b> Deaths (3.7%)	<b>496</b> Deaths (3.4%)
<b>1,044,177</b> Active Cases (73.2%)	<b>19,709</b> Active Cases (17.7%)	<b>8,606</b> Active Cases (8.9%)	<b>11,103</b> Active Cases (75.3%)

## Statistics

- More than 111,000 cases have been confirmed across the **ASEAN+3 region**. Out of more than 1,000 newly confirmed cases in the region, almost half were reported in **Japan** and **Indonesia** as both confirmed around 250 new infections.
- For the first time since the coronavirus outbreak started, **China** has not reported any new deaths.
- **Worldwide**, total confirmed deaths topped 80,000. Total confirmed cases reached more than 1.4 million. With more than 300,000 recoveries, the number of active cases worldwide has topped 1 million.

## News

- **Japan's** Prime Minister Abe formally declared a one-month state of emergency for Tokyo and six other prefecture. The emergency gives governors the authority to call on people to stay at home and businesses to close.
- In the **Philippines**, the strict lockdown of the main island Luzon was extended until the end of the month. The lockdown was originally implemented about three weeks ago.
- **Indonesia's** capital Jakarta will close schools and workplaces, limit religious events and cultural activities, and ban gatherings of more than five people for an extendable two weeks, effective from Friday.
- The lockdown of Wuhan, **China's** coronavirus epicenter, ended today, with outbound travel restrictions lifted. The lockdown first came into effect on January 23—approximately eleven weeks ago.
- In **Korea**, two coronavirus patients recovered after being treated with plasma—a blood fluid—from recovered survivors. Plasma therapy could become an alternative treatment method, but large-scale clinical trials to prove its effectiveness are needed. Several countries have started trials.

## Overview of COVID-19 Cases

Data as of 7/4/2020

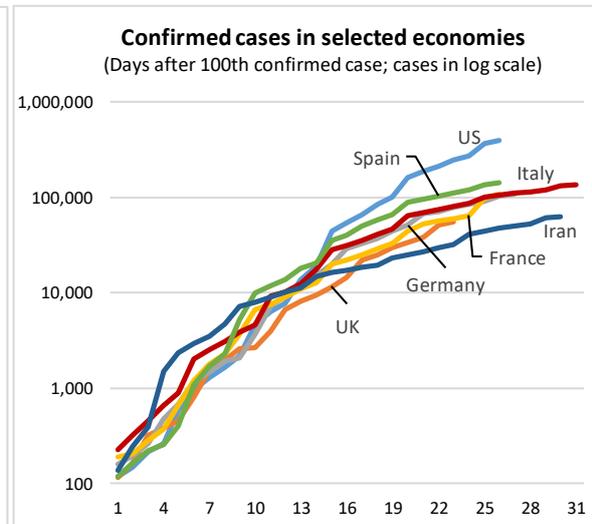

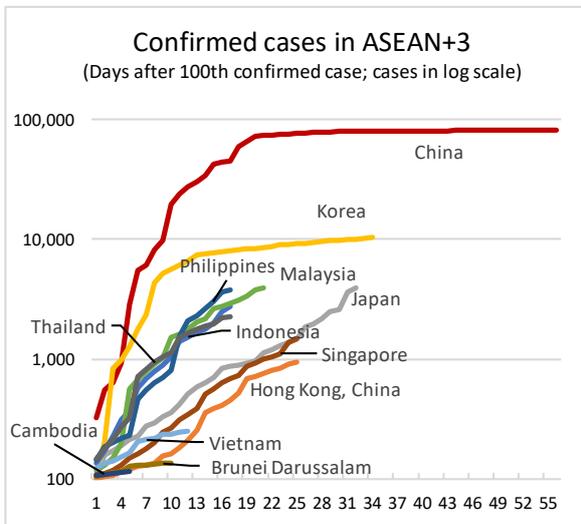

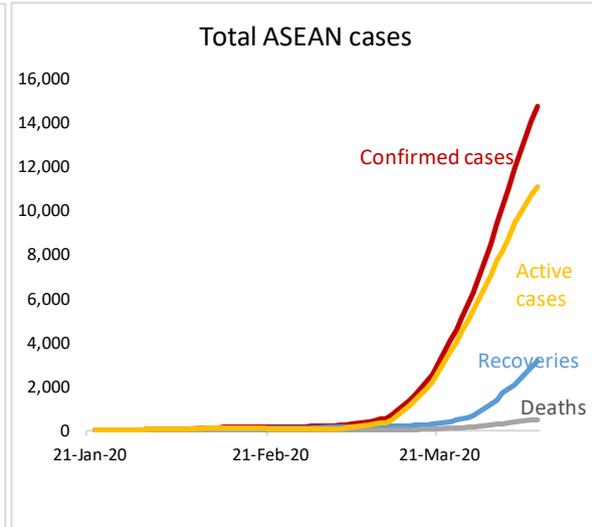

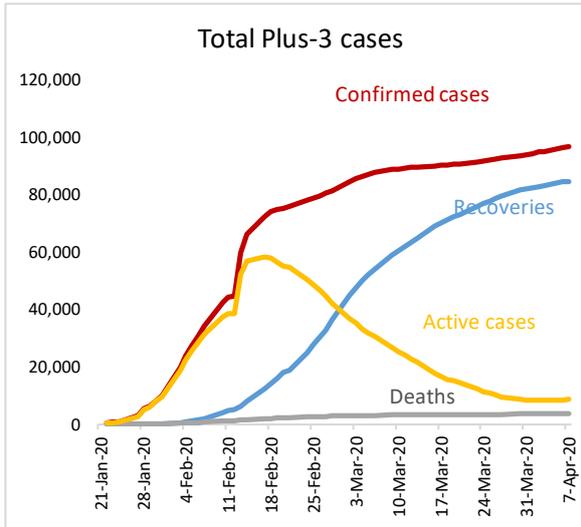

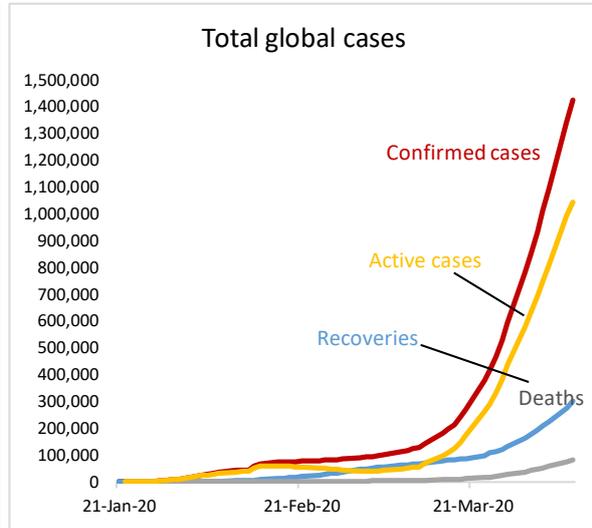

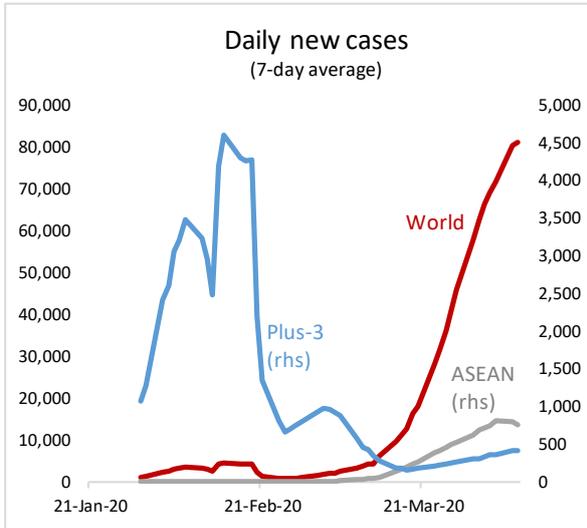

Economy	Total Cases	Cases per 1M Population	New Cases	ΔNew Cases <sup>1</sup>	Δ% New Cases	Total Deaths	New Deaths	Fatality Rate (%)	Total Recovered	Recovery Rate (%) <sup>2</sup>	Active Cases

Notes: New cases since last business day. Monday's data includes weekend data. Δ% refers to percentage change since last business day. Fatality rate measured as deaths per confirmed infections.

1/ As new data is recorded on business days only, Monday's data includes weekend data. For ease of comparison, ΔNew Cases for Monday's data is based on the 3-day Saturday-Monday average.

2/ Recovery rate is a proxy for the stage of the cycle.
