## Statistics

- **Worldwide** confirmed cases surpassed 1.5 million.
- Daily new cases worldwide and in the ASEAN region seem to be levelling off, though the epidemic curve in many countries is still steeply on the rise.
- With 142 cases, **Singapore** reported its largest daily increase in confirmed cases so far, bringing total infections to 1,623.
- **Japan** confirmed 351 new cases yesterday, bringing its total to 4,257.
- Both **Indonesia** and **Malaysia** confirmed fewer new cases than the day before, but with 218 and 156 newly confirmed cases, respectively, the total number of confirmed infections reached around 3,000 in Indonesia and more than 4,000 cases in Malaysia.

## News

- A new Bill in **Singapore** prohibits any social gatherings in both private and public spaces of any size. Offences can be fined with up to S\$10,000 and/or jail up to 6 months.
- The **WHO** published new guidance for the use of face masks. The guidelines acknowledge that masks at the community level could help with an overall comprehensive response to the coronavirus, but are insufficient on their own. The WHO noted that the wide use of masks by healthy people in the community setting is not supported by current evidence and carries uncertainties and critical risks. But it could reduce the potential exposure risk from infected persons during the pre-symptomatic period and lessen stigmatization of individuals wearing mask when infected.

Notes: New cases since last business day. Monday's data includes weekend data. Δ% refers to percentage change since last business day. Fatality rate measured as deaths per confirmed infections.

1/ As new data is recorded on business days only, Monday's data includes weekend data. For ease of comparison, ΔNew Cases for Monday's data is based on the 3-day Saturday-Monday average.

2/ Recovery rate is a proxy for the stage of the cycle.
