ASEAN+3 Regional Economic Outlook – July 2024 Update

Sustained growth with continued disinflation

Regional Surveillance July 16, 2024

Key Highlights

Sustained momentum: ASEAN+3 on track to achieve steady growth in 2024 and 2025, underpinned by resilient domestic demand and recovery in exports.

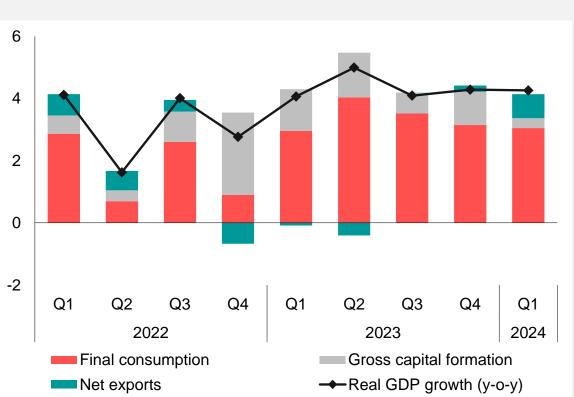

Easing inflation: Inflation continues to ease but possibility of higher inflation cannot be ruled out if commodity and shipping prices escalate further.

Risks remain: In particular, US-related risks factors have become more salient. Rebuilding of policy space essential for the region to prepare for future shocks.

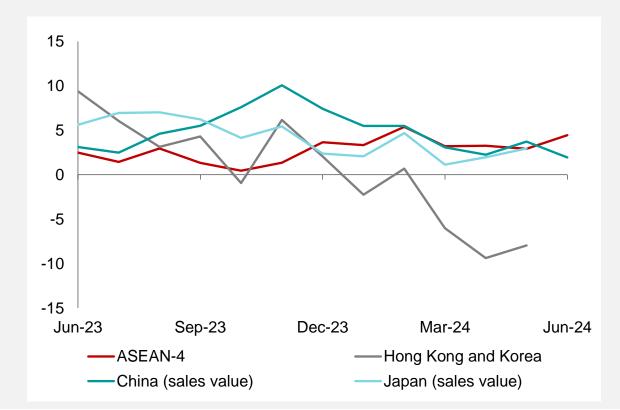

Domestic demand continues to be a key driver of growth

Firm household spending was underpinned by strong employment conditions amid lower inflation

Selected ASEAN+3: Contribution to Real GDP Growth (Percent, year-on-year) Retail sales have also been bolstered by the robust recovery in travel and tourism

Selected ASEAN+3: Retail Sales Volume (Percent, year-on-year)

Source: National authorities via Haver Analytics; AMRO staff calculations.

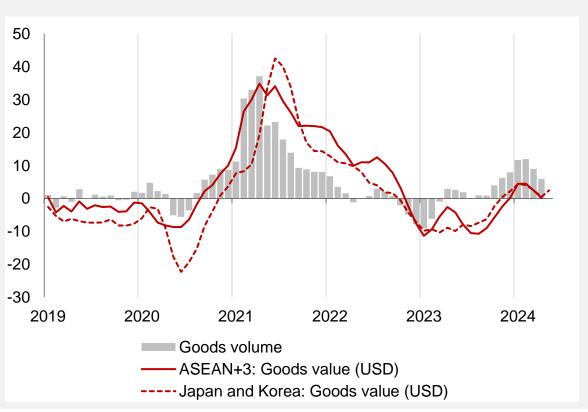

Note: Statistical discrepancies are not shown. Excludes Cambodia, Lao PDR, Myanmar, and Vietnam due to data unavailability.

Source: National authorities via Haver Analytics; AMRO staff calculations. Note: ASEAN-4 includes Indonesia, Malaysia, Singapore, and Thailand.

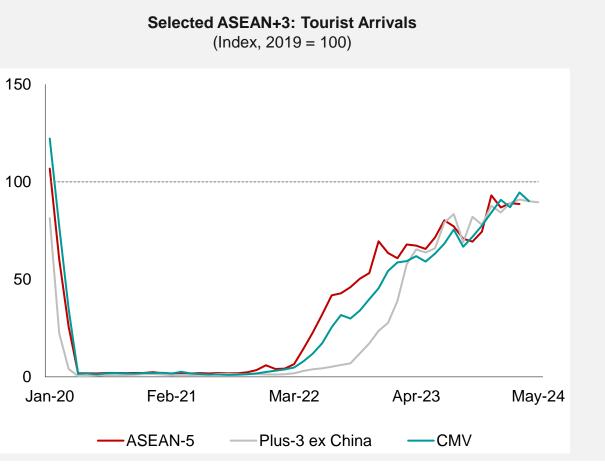

Turnaround in exports of goods and services remains

Anticipated recovery in goods exports is materializing, led by Japan and Korea

Selected ASEAN+3: Export Growth (Percent, year-on-year)

Tourism recovery continues apace, aided in part by visa waiver for Chinese tourists

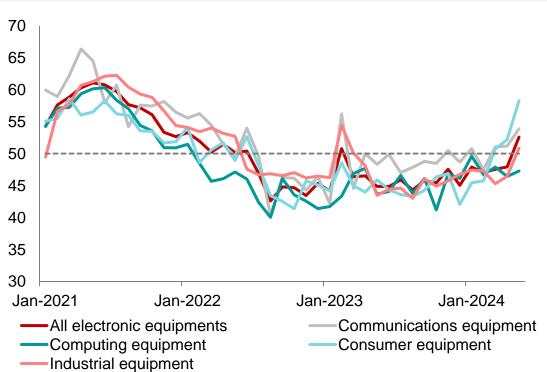

Source: National authorities via Haver Analytics; AMRO staff calculations. Note: Goods exports data are up to April 2024 and are 3-month moving averages.

Source: National authorities via Haver Analytics.

Note: Excludes Lao PDR due to data unavailability. ASEAN-5 = Indonesia, Malaysia, Philippines, Singapore and Thailand; CMV = Cambodia, Myanmar and Vietnam; Plus-3 ex China = Hong Kong, Japan, and Korea. Data up to March 2024 (ASEAN-5), April 2024 (CMV), and May 2024 (Plus-3 ex China).

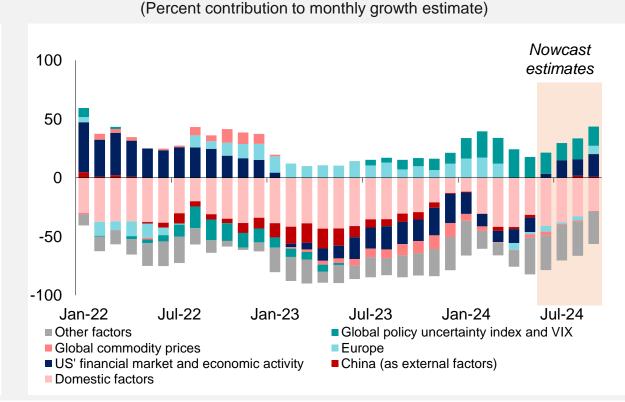

Exports recovery broadening especially in semiconductors

Broad-based increase in demand for semiconductors seen, supporting broader exports recovery in the region

Global: Electronics New Orders PMI (Index, >50 = expansion) Improving economic activity in the US and reduced global economic uncertainty to support overall near-term regional exports

ASEAN+3: Variable Drivers of ML-based Export Growth

Source: MarineTraffic; Haver Analytics; and AMRO staff calculations.

Note: Variable importance is derived from Shapley values, which are additive in terms of the difference between the model's prediction and the average prediction across multiple scenarios; thus, the sum may differ from the model prediction. Absolute values of all variables = 100. Variable groupings are based on the categories indicated in del Rosario, Quach, and Wynn (2024). Data cover up to July 1, 2024.
